

Kobelco SK300LC-10

Kobelco launches the new SK300LC-10

Kobelco has recently announced the release of the new 30 tonne excavator the SK300LC-10.

Kobelco General Manager – Sales & Service Doug McQuinn says the new model, part of the latest Generation 10 range, hits the sweet spot for those wanting something big, but not too big.

“Kobelco machines are engineered for maximum capacity at maximum efficiency, and the SK300-LC is no different,” Doug says.

“With the launch of this model we’re addressing what the industry asked for – a tough, reliable, performance-driven 30 tonne machine. That’s what we’re delivering. “As you would expect from Kobelco, this new generation boasts class-leading fuel economy and excellent work performance.”

“The Generation 10 machines are serious diggers, but innovative engineering means they use up to 10 per cent less fuel compared to their predecessors. This dramatically lowers fuel costs while still producing significant power,” Doug says.

Kalmar Forklift Trucks

Kalmar builds on it's extensive range

First Look DCG160-12T

Kalmar are putting the finishing touches on their new release DCG Medium Forklift Range. These new machines will offer the usual high levels of technology, productivity and long life that Kalmar have become reknowned for globally.

The models will offer a wide range of capacities from the 10 ton capacity DCG100-6T at 600 mm load centre up to DCG160-12T 16 ton at 1200 mm load centres and DCG180-6T. Kalmar have produced a model range that will hold a wide appeal and meet customers needs.

Anticipated for release in the second quarter 2017, these new units wont be lacking in specification. They are to be equipped with Kalmar's Flex Cab and Volvo power plants.

Kalmar Super Heavy Forklift Trucks

Kalmar have been at the forefront of Big Lift Truck technology for many years including the world record holding Super Gloria Reachstacker.

Introducing the Super-heavy range of Kalmar forklift trucks available from 60 to 70 tonne capacities. Designed to lift the heaviest loads safely and efficiently across industrial applications.

Models Available:

DCG600-15 DCG620-12 DCG620-15 DCG650-15 DCG700-9

These units are now available in the latest “G” specification and technology adding to Kalmar's extensive range of forklift trucks, reachstackers and container handlers

Manitou - Evolving Construction Equipment

Construction has received a lift with the recently released Manitou MT1135H Telescopic Handler. Designed to provide access to second and third construction levels. This 11 metre 3.5 tonne unit provides some extra capacity, reach and technology compared to the MT1030S which has been a staple construction machine for years. MT1135H offers easy operation with a single joystick for controlling lifting functions, a system Manitou calls Switch and Move.

Attention to detail is strong with a focus on the small things that can make life easy. Excellent access to the cabin with a wide door opening, improved 360 vision with larger windows and a larger operator space are just some of the user friendly features in the 1135. These items all add up to making the MT1135H very easy to live with.

Productivity has been given a boost with improved function speeds. Boom retraction down to a low 9 seconds. and Crowd or Dump functions are 4 seconds to complete when the unit has a bucket fitted.

The MT1135H is perfectly at home on construction sites with strong ground clearance or 420 mm 4 wheel drive and the steering system offers 3 modes of steering getting you out of the tightest spots.

Safety is a priority with the cabin meeting ROPS and FOPS Level 2 standards plus the machine is fully compliant to AS1418.19 and AS2550.19

Complimenting the MT1135H is an extensive range of construction attachments to keep the machine as productive as possible. Genuine attachments are "plug and play" and quickly de-couple for fast changes. All Manitou attachments come with off the shelf load charts ensuring safety and compliance to safety regulations.

Available attachments to suit this model are:

- * Standard Forks
- * Construction Buckets
- * Rehandling Bucket
- * 4 in 1 Bucket
- * Extendable Jib
- * Hydraulic Winch
- * Frame Mounted Hook
- * Concrete Mixing Bucket
- * Concrete Skip

Manitou MT1135H Features

- * Hydrostatic Transmission
- * 4WD and 3 Steering Modes
- * Frame Leveling system
- * Stabilisers
- * Single Joystick Control
- * Large cab with excellent access and visibility
- * Digital Dash with On Board Diagnostics
- * Similar weight and footprint to MT1030S
- * 420 mm Ground Clearance
- * 3.65 Metre turning circle
- * Excellent engine access with folding lower bonnet
- * Factory Airconditioned cabin
- * ROPS / FOPS II Certified Cabin

GEHL

There Is Nothing Tougher Than A Gehl!

With the New R Series Skid Steer Loader getting runs on the board there has never been a better time to check out these rugged units. With a solid specification list and a wide range of radial and vertical lift machines, there will be one to suit your needs.

Come and have an obligation free dig in our sand patch and make you own mind up!

Manitou Telescopic Handlers are available on Manitou Fast-Track Finance with no deposit, no financials to approved applicants. Conditions apply
