## Manitou - MRT-X2150+ Rotating Telehandler

**Manitou** have manufactured Rotating Telehandlers for many years as a solution for those looking for more flexibility than the run of the mill telehandler can provide.

This highly adaptable machine is available from a 14 metre, 4.0 tonne capacity right up to 5.0 tonne capacity with a 29.7 metre lifting height.

The MRT-X2150+ shown offers an excellent blend of reach and capacity at 4999 Kg capacity up to 20.9 Metres.

MRT-X is highly productive providing solutions across Telehandler, Crane and Elevating Work Platform tasks without the need for additional machines. It's ability to rotate allows unique access to areas that other equipment can't reach making it especially useful in areas with restricted access.

The MRT-X2150+ offers cost effective benefits across a wide range of industries from Mining to Construction and even Local Authorities.

With a wide and unique range of genuine attachments, such as the innovative 3D EWP Basket System, tasks can be completed quickly and easily rather than using costly scaffolding or other less mobile solutions.

Safety is a priority with the cabin meeting ROPS and FOPS Level 2 standards plus the machine is fully compliant to AS1418.19 and AS2550.19
