

Mining Special

Manitou Mining Equipment

Manitou provide a wide range of mining machinery suitable for support, surface and underground applications. With over 60 years of rough terrain experience, equipment doesn't come much tougher than a Manitou machine.

Industrial and rough terrain forklifts are complimented by warehousing equipment to cover all aspects of site from stores to lay down and production areas. Manitou forklifts are produced in a wide range of capacities, most types and lifting height suiting most applications.

Manitou Telescopic Handlers range from 2.0 to 35 ton capacities. The flexibility of telehandlers ensure they perfectly suit the Mining Industry with a selection of support attachments such as forks, jibs, tyre & pipe clamps and cylinder handlers. Manitou also produce very high capacity EWP baskets for some telehandler models.

Manitou Rotating telehandlers offer up to 30 metre lifting heights, 5.0 ton capacity and attachment capability. Manitou MRT bridges the gap between cranes and telehandlers.

Manitou's extensive range of attachments ensure these machines are multi purpose to maximise return on investment. Download the Attachment Guide at www.liftright.com.au

Manitou Aerial Work Platforms

ATJ Range

The Manitou ATJ range consists of 4 articulated machines with working heights from 16 to 20 metres.

These machines offer exceptional rough terrain capability even handling Western Australian sand which will stop most equipment.

ATJ capacities are 230 Kg or 2 person however the ATJ160+ offers a unique 400 Kg, 3 person capability with a full outdoor rating and 16.2 metre working height.

The ATJ units provide 4 Wheel Drive, 3 Steering modes and galvanised baskets as standard equipment. They are simple to maintain and include onboard diagnostic systems ensuring correct information is provided to Technicians. Their robust construction ensures a long service life in adverse conditions.

New Gehl Models

Gehl Backhoe BL818 & BL818S

This week Gehl announced the introduction of the BL818 and BL818S Backhoe loaders to the Australian market. Manufactured tough like other Gehl products, purchasers will look forward to a long and productive machine life.

The Gehl Backhoe is built using quality and well known Perkins, Cassapa and Carraro components.

Available in 4x2 or 4x4, Canopy or Airconditioned Cabin, with or without Side Shift

NEW GEHL
BACKHOE LOADERS

Gehl RT165 Track Loader

RT165 is coming soon to Australia with shipments due in December. The new model joins the RT175, RT210 Generation 3 models that have been available for some time.

The 165 has reduced dimensions but loses little in terms of performance and capability. Operating Weight is 3638 Kg and this unit is available with the full range of standard and optional equipment.
